PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate and Research and Development Engineer seeking entry-level VLSI opportunities in RTL design and design verification. Foundation in Verilog, digital electronics, C and Python, supported by embedded systems and electromagnetic simulation projects. Experience in circuit troubleshooting, technical documentation and engineering component inspection.

TECHNICAL SKILLS

Digital Design and Programming: Verilog, Digital Electronics, C, Python, Object-Oriented Programming, MATLAB
Embedded Systems and Interfaces: Arduino, ESP32, Raspberry Pi, Sensor Integration, UART, I2C, SPI
Engineering Tools: ANSYS HFSS, Multisim, KiCad, EasyEDA, Schematic Design, PCB Layout
RF and Simulation: S-Parameters, Impedance Matching, VSWR, Radiation Patterns
Engineering Practices: Circuit Troubleshooting, Technical Documentation, Engineering Drawings, First Article Inspection

PROFESSIONAL EXPERIENCE

Research and Development Engineer (ECE) Jun 2026 – Present
YuviPep Educational Pvt. Ltd. | Parent company: Telaverge Communications

- Develop IoT and electronics prototypes, integrating components and troubleshooting circuit functionality during development.
- Prepare practical demonstrations in electronics, robotics and IoT; present component operation, system behavior and troubleshooting methods.

Guest Faculty Lecturer – Electronics and Communication Nov 2025 – Jun 2026
Government Engineering College, Talakal | Koppal, Karnataka

- Delivered lectures and practical demonstrations in Digital Signal Processing, Embedded Systems and Wireless Communication to 60+ undergraduate students.
- Developed assessments and laboratory assignments; guided projects using microcontrollers, Arduino, ESP32, HFSS simulation and PCB design.

Quality Team Member Jun 2025 – Oct 2025
Eaton Industrial Products Private Limited | Bengaluru, Karnataka

- Interpreted engineering drawings and specifications to inspect components under AS9100 and ISO 9001 quality procedures.
- Conducted First Article Inspection and documented dimensional results and component changes using calipers, micrometers and CMM measurements.

SELECTED ENGINEERING PROJECTS

Compact 5G Antenna Simulation for IoT Applications Aug 2024 – Jan 2025

- Designed and analyzed an antenna model in ANSYS HFSS, evaluating S11, VSWR, bandwidth and radiation efficiency through electromagnetic simulation.
- Studied geometry and impedance matching; documented the design methodology and simulation results for an IJRAR research publication.

Microstrip Patch Antenna Optimization Jan 2024 – Jul 2024

- Evaluated 2.4 GHz and 5.8 GHz antenna models in HFSS; compared design variations using S11, gain, bandwidth and radiation patterns.

Smart Home Automation Using Embedded Systems and IoT Feb 2023 – Nov 2023

- Integrated Arduino Mega, ESP8266, sensors and relay modules for home monitoring and automated control.
- Developed embedded C firmware for sensor acquisition and actuator control; designed circuit schematics and PCB layout in EasyEDA.

EDUCATION

Bachelor of Engineering – Electronics and Communication Jan 2022 – Jun 2025
Government Engineering College, Talakal **CGPA: 8.25/10**

Diploma – Electronics and Communication Engineering Jun 2019 – Oct 2021
Government Polytechnic, Koppal **78.29%**
